

Imagewerkz Visual Media - David Brosius

I've been in the video business over 20 years and have experience in most aspects of video/film/HD/4K (and more-K ;-) production including turn-key idea-to-execution services. I'm used to working with small crews and large crews - National Commercials, Promotional videos, Network Series and Features.

With my video engineering background, I am uniquely experienced and equipped as VTR/Playback (with or without streaming), and can provide other specialized technical services such as playback to multiple on-set or practical computer monitors and TV's in multiple groups, such as when shooting in a casino or sports bar, with lots of monitors around in the background.

I can use QTake recording/playback software, with live wi-fi and internet streaming capability for VTR/Video Assist, or record with multiple dedicated 4K recorders. QTake has almost no video delay when streaming locally to iPhones and iPads, and very little delay when streaming to the internet - unlike Zoom or other streaming options. Two ATEm switchers provide video routing, switching, picture overlays and live chroma key compositing, if needed.

For Video Village, I can provide 43", 55", consumer-grade monitors, 2x 24" professional-grade monitors and/or 15.6", 21.5" studio-grade monitors, with multiple wireless video links.

I can also offer traditional teleprompting, or prompt to multiple monitors at once. I have several teleprompters available, different sizes, traditional mirrored up to 20" studio-sized, or direct-view.
